Trust & Authority Section

Why Companies Trust ChauTech

Metric	Description
10+ Years	Experience in IT recruiting and IT consulting in the German market
30,000+	Vetted IT and engineering experts in our active talent network
24 Hours	Average time to first candidate presentation
GVP Member	Employers' and Trade Association for Personnel Services (Germany)

ChauTech Consulting GmbH is an IT staffing and IT consulting company headquartered in Hamburg. As a GVP member, we adhere to recognized quality and compliance standards in the staffing industry, an important trust factor for companies relying on legally compliant temporary staffing (ANÜ) and reputable placement services.

Problem & Solution (Pain Points)

The IT Skills Shortage Is Slowing Your Growth — We Fix That

The Problem:

- Open IT positions remain unfilled for 6 months or longer on average.
- Internal HR teams rarely have the technical depth to properly evaluate IT profiles.
- Traditional staffing agencies deliver many candidates, but rarely the right ones.
- Projects stall because DevOps, cloud, or SAP expertise is missing.

The ChauTech Solution:

- Technical recruiting instead of blind applications: Our team consists of IT specialists who truly understand requirements, not just HR generalists.
- AI-powered matching: Our recruiting technology matches skills, availability, and project context in real time
- Flexible contract models: Freelance, permanent, ANÜ, or temp-to-perm — tailored to your needs, not to our standard process
- Consulting, not just placement: When needed, we take on entire project packages with our own technical teams

Overview: Our Core Services

IT Recruiting & Staffing

We fill your vacancies with well-matched IT and engineering experts, freelance, permanent, or through temporary staffing (ANÜ). From full-stack developers to SAP consultants.

IT Consulting & Project Delivery

Our in-house technical teams handle software development, cloud & infrastructure projects, and SAP consulting, from concept to delivery.

IT Project Contracting

For clearly defined projects, we deliver outcomes, not just staff-days, including full responsibility for quality and timeline.

Why ChauTech?

What Sets ChauTech Apart From Traditional IT Staffing Firms

- Genuine in-house technical expertise: Our consultants aren't just recruiters — they bring real IT expertise in software development, cloud/DevOps, and SAP, allowing us to speak the same language as your technical teams.
- AI-powered recruiting process: We use AI technology for pre-screening and skill matching, reducing time-to-candidate to an average of 24 hours.
- A network with substance: Over 30,000 active IT and engineering profiles — from junior developers to enterprise architects.
- Association-vetted credibility: As a GVP member, we adhere to industry-wide recognized standards for fair and legally compliant staffing.
- One point of contact for both recruiting and consulting: No disconnect between staffing and project delivery.

FAQ

Frequently Asked Questions About ChauTech Consulting

What does ChauTech Consulting GmbH do?

ChauTech Consulting is an IT recruiting and IT consulting company based in Hamburg. The company places IT professionals (freelance, permanent, ANÜ) and delivers its own IT projects in software development, cloud/infrastructure, and SAP.

How quickly does ChauTech deliver candidates?

Thanks to its AI-powered recruiting process, ChauTech typically presents the first suitable candidate profiles within 24 hours.

What contract types does ChauTech offer?

ChauTech offers freelance placement, permanent placement (direct hire), temp-to-perm, temporary staffing (ANÜ), and project-based IT contracting.

In which regions does ChauTech operate?

ChauTech Consulting is headquartered in Hamburg and serves companies throughout Germany and the wider German-speaking region.

What makes ChauTech different from other IT staffing companies?

ChauTech has genuine technical IT expertise in-house — consultants come from hands-on backgrounds in software development, cloud, and SAP — combined with an AI-powered matching process and a network of over 30,000 IT experts.
